Subject: settlement is good do it now

settlement is good do it now.

Enough time and money has been wasted on all this needless litigation. Imagine in the one country in the world where creativity and imagination can lead the way to tremendous development of new technology and creation of jobs for people, where the government is going after and murdering and stifling one of the largest and most successful companies of its kind.

Leave Microsoft alone so it can continue to create jobs and new technology in the world and especially in the US where we need it now. Get off their back and let

us recover this weak and sad economy. YOU the government are using my money for the wrong things. Thank you.
